## Quick FAQs

### What makes this different from typical probiotics?

Uses **exclusive canine-native strains** selected for relevance to canine gut biology, rather than human-derived or generic culture strains.

### What evidence supports it?

Evaluated through **pre-clinical research and observational case studies**, showing improvements in stool quality and digestive balance within 7 days.\* Full clinical trial underway; results expected H1 2026.

### How is it used in practice?

As a **short, defined protocol** with the option to transition to daily maintenance support as needed.

### Why choose working with Zesty Paws?

Zesty Paws is a recognized brand trusted by pet parents. It brings to vet-channel a science-first approach — developing products with biological relevance and clinical practicality. It is set to build a long-term partnership aligned with modern clinical practice.
