For veterinary professionals and industry partners

*Based on early clinical data from a small-sample study conducted in 2023.

POWERED BY

Canine Triple Shield™

When to Recommend

- After completion of the 7-Day Protocol
- As part of ongoing digestive health routine
- For dogs with recurring digestive sensitivity
- Digestive disruption and occasional diarrhea adjusting the dosage and length of use as per vet discretion.

Quick FAQs

What makes this different from typical probiotics?

Uses **exclusive canine-native strains** selected for relevance to canine gut biology, rather than human-derived or generic culture strains.

What evidence supports it?

Probiotic strains selected through advanced canine microbiome research and evaluated in early clinical studies for biological relevance to support a healthy canine gut ecosystem at a higher CFU inclusion.

How is it used in practice?

Flexible directions allow continued **daily use** or as recommended by the veterinarian to support **individualized care**.

Why choose working with Zesty Paws?

Zesty Paws is a recognized brand trusted by pet parents. It brings to vet-channel a science-first approach — developing products with biological relevance and clinical practicality. It is set to build a long-term partnership aligned with modern clinical practice.
