

Rebound™ Canine High Performance PRP Elite Regenerative Therapy for Canine Excellence

Redefining Canine Recovery

Harness the power of your patient's own biology with Rebound PRP — a premium, autologous Platelet-Rich Plasma system engineered for superior healing outcomes in today's advanced veterinary practices.

Precision. Purity. Performance.

Clinical Indications

- Cranial cruciate ligament injuries (partial tears, post-surgical adjunct)
- Osteoarthritis & degenerative joint disease
- Soft tissue & tendon/ligament injuries
- Chronic wounds and non-healing lesions
- Adjunctive support for orthopedic and soft tissue surgery

Signature Advantages

- Customizable Formulations — Tailor leukocyte-rich or leukocyte-poor PRP to match each case for optimal results
- Scientifically Validated — Peer-reviewed system with species-specific protocols developed in partnership with leading veterinary institutions
- Streamlined Workflow — Blood draw to therapeutic injection in under 20 minutes
- No Capital Investment — Compatible with any standard centrifuge
- Premium Sterile Kit Design — Patent-pending components engineered for maximum platelet recovery and sterility

- Exceptional Yield — 60 mL whole blood yields up to 20 mL high-quality PRP

Why Leading Practices Choose Rebound

- Delivers concentrated growth factors and bioactive proteins directly to the site of injury
- Measurable reductions in pain and lameness with improved mobility scores
- Natural, autologous therapy with an exceptional safety profile
- Versatile for in-clinic or field use
- Backed by dedicated regenerative medicine experts

Kit Components (Premium Single-Use Design)

- High-purity anticoagulant
- Precision blood collection set
- Dual-chamber processing tubes
- Sterile transfer and injection syringes
- 22g spinal needles and secure Luer connections

Shelf Life: 24 months at room temperature

Species Optimized:

Canine (and feline) specific spin protocols Elevate Your Regenerative Medicine Offering. Position your practice at the forefront of veterinary orthopedics and sports medicine with Rebound PRP — the refined choice for discerning clinicians and elite canine athletes.
