

Boost Your Practice Revenue with Rebound High-Performance PRP Add One Simple Regenerative Treatment and Watch Profits Grow

Your clients want advanced, non-surgical options for their pets' osteoarthritis, cruciate injuries, tendon/ligament issues, wounds, and chronic pain. Rebound High-Performance PRP lets you deliver cutting-edge regenerative medicine in-house—quickly, safely, and profitably—without major capital investment.

Why Rebound High Performance PRP Fits Perfectly in Your GP Practice

- **Autologous & Safe:** Uses the patient's own blood—minimal risk, high owner acceptance.
- **Versatile:** Ideal for canines and felines (partial cruciate, OA, soft tissue injuries, wounds, post-op support). Customizable (leuko-poor or leuko-rich).
- **Fast & Easy:** 20-30 minute process from blood draw to injection. Uses any standard centrifuge—no expensive equipment required. Shelf-stable kits with 2-year life.
- **Proven Demand:** Pet owners seek alternatives to long-term meds or surgery. PRP accelerates healing naturally and improves quality of life.

The Economics: Clear, Scalable Profit

Kit Cost: \$160–\$220 per treatment (Rebound Canine/Equine PRP kits).

Typical Clinic Charge: \$600–\$1,000+ per session (market range for canine/feline PRP; many practices charge \$800–\$1,300 including sedation/radiographs as a premium cash-pay service).

Conservative Per-Treatment Profit (at \$750 average charge):

- Kit: \$160
- Supplies/Labor (draw, processing, injection, sedation): ~\$100
- Net Profit per treatment: ~\$490

What 8–15 Cases per Month Looks Like in Real Practices

Many general practices that integrate Rebound Canine PRP see this volume within 6–12 months as awareness grows among senior pet owners, active dogs, and chronic cases. Here's the financial impact:

At 8 Cases/Month (conservative ramp-up):

- Monthly Revenue: \$6,000
- Monthly Profit: ~\$3,920
- **Annual Profit: ~\$47,040**

At 12 Cases/Month (typical practice offering):

- Monthly Revenue: \$9,000
- Monthly Profit: ~\$5,880
- **Annual Profit: ~\$70,560**

At 15 Cases/Month (with strong marketing/referrals):

- Monthly Revenue: \$11,250
- Monthly Profit: ~\$7,350
- **Annual Profit: ~\$88,200**

These figures assume conservative pricing and modest overhead. Many practices achieve higher averages through:

- Repeat injections (often 2–3 per patient/year).
- Multi-joint or combined PRP/PRF treatments.
- Bundling with exams, imaging, or follow-up laser therapy.
- Premium positioning for sports medicine or senior wellness plans.

Additional Benefits:

Pure cash-pay service (no insurance hassles), low added overhead, and high client satisfaction that drives referrals and practice loyalty. One new revenue stream like this can meaningfully boost overall profitability while differentiating your clinic from competitors.

Low Barrier to Entry: Start with existing staff and centrifuge. Training is straightforward with Rebound's resources (videos, protocols).

Ready to Add a Profitable New Revenue Stream?

One treatment changes everything—for your patients, clients, and bottom line.

Rebound High Performance PRP: Affordable. Adaptable. Profitable Regenerative Medicine for Everyday Practice.
